91. Find out the alternative figure which contains figure (X) as its part

92. Find out the alternative figure which contains figure (X) as its part

Directions: Question No. 93 & 94, find out which of the answer figures (a), (b), (c) and (d) completes the figure matrix?

93. Select a suitable figure from the four alternatives that would complete the figure matrix

94. Select a suitable figure from the four alternatives that would complete the figure matrix

95. Find the number of triangles in the given figure

(a) 1

(c) 3

(b) 2

(d) 4

96. Find the odd one out.

Car; Scooter; Bus; jeep

(a) Car

(c) Bus

(b) Scooter

(d) Jeep

97. Find the odd one out.

(a) CD

(b) DF

(c) HJ

(d) KM

Directions: Question No. 98 & 99, choose the statement that is best supported by the information given in the question passage

- 98. Yoga has become a very popular type of exercise, but it may not be for everyone. Before you sign yourself up for a yoga class, you need to examine what it is you want from your fitness routine. If you're looking for a high-energy, fast-paced aerobic workout, a yoga class might not be your best choice. This paragraph best supports the statement that
 - (a) yoga is more popular than high-impact aerobics.
 - (b) before embarking on a new exercise regimen, you should think about your needs and desires.
 - (c) yoga is changing the world of fitness in major ways
 - (d) yoga benefits your body and mind

- 99. Human technology developed from the first stone tools about two and a half million years ago. At the beginning, the rate of development was slow. Hundreds of thousands of years passed without much change. Today, new technologies are reported daily on television and in newspapers. This paragraph best supports the statement that
 - (a) stone tools were not really technology.
 - (b) stone tools were in use for two and a half million years
 - (c) there is no way to know when stone tools first came into use.
 - (d) In today's world, new technologies are constantly being developed

Direction: Question No. 100, the problem consists of three statements. Based on the first two statements, the third statement may be true, false, or uncertain.

100. Tanya is older than Eric.

Cliff is older than Tanya.

Eric is older than Cliff

If the first two statements are true, the third statement is

(a) true

(b) false

(c) uncertain
